HARSHITHA A

harshitha6569@gmail.com | +91 8073516569 | linkedin.com/in/harshitha-a-19b110374

PROFESSIONAL SUMMARY

Information Science and Engineering student with a strong foundation in programming, data structures, databases, and problem-solving. Proficient in Python, C, Java, SQL, and basic web technologies. Interested in applying technical knowledge through real-world projects and continuously learning new technologies. Experienced in developing academic projects focused on inventory management and secure data disposal. Strong interest in software development, database management, and building practical solutions to real-world problems.

EDUCATION

Nagarjuna College of Engineering and Technology 2024–2028
Bachelor of Engineering in Information Science and Engineering

Vision Girls PU College, Anagalapura, Bengaluru 2022–2024
Second PUC — 90.83%

St. Thomas School, Melur 2021–2022
Class 10 — 91.20%

PROJECTS

Inventory Management System

- Developed a data structure-based system to manage inventory records efficiently.
- Implemented CRUD operations for item addition, updates, deletion, and retrieval.
- Explained the purpose of managing and retrieving inventory records.

Secure Data Wiping for Trustworthy IT Asset Recycling

- Designed a solution to securely erase sensitive data from IT assets before recycling.
- Focused on data integrity, security, and safe data disposal practices.
- Added the purpose of preventing unauthorized data recovery.

AI Context-Recommender System for Intermediate Students – Grow with Gyan

- Developed an AI-based system to recommend suitable engineering colleges based on marks, KCET rank, branch preference, and budget.
- Used college data such as fees, cut-offs, eligibility, and branch availability for personalized recommendations.
- Implemented a RAG-based approach using LangChain for AI-driven recommendations.
- Enabled students to compare colleges based on key admission factors.

CERTIFICATIONS

- Cisco C Essentials
- Cisco Python Essentials I
- Python Programming with Red Hat
- Data Analytics Job Simulation – Deloitte (via Forage), July 2026

SKILLS

Programming: Python, C, Java, Algorithms
Web: HTML
Computer Science: Data Structures and Algorithms (Basics), DBMS, CRUD Operations, NoSQL
Databases: MySQL, MongoDB

LANGUAGES

English, Kannada
